A. Business and Performance

A.1 Business

Barents Reinsurance S.A. ("Barents Re" or the "Company") was incorporated in the Grand-Duchy of Luxembourg on January 14, 2015 as a "Société Anonyme" under Luxembourg law. The Company is registered with the "Registre de Commerce et des Sociétés" of the Grand-Duchy of Luxembourg under the number B194011.

The registered office is located 26, rue Louvigny, L-1946 Luxembourg. Barents Reinsurance S.A. is under the supervision of the Commissariat aux Assurances (CAA) in Luxembourg. In addition, the UK branch is supervised by the Prudential Regulation Authority (PRA) and the Financial Conduct Authority (FCA).

Their respective contact details are set out below:

Commissariat aux Assurances	Prudential Regulation Authority	Financial Conduct Authority	
11, Rue Robert Stumper	Bank of England	12 Endeavour Square	
L-2557 Luxembourg	Threadneedle Street	London	
Grand-Duché de Luxembourg	London	E20 1JN	
	EC2R 8AH		

The external auditor is KPMG Audit S.à r.l. with the following address:

KPMG Audit S.à r.l.

39, Avenue John F. Kennedy

L-1855 Luxembourg

Mrs Stéphanie SMETS

Email: stephanie.smets@kpmg.lu

The Company is held directly by BRM Barents S.C.A. and it is an indirect subsidiary of Barents Re Reinsurance Company, Inc. The important lines of business of Barents Re. at 31 December 2023 were:

- Credit and suretyship insurance and proportional reinsurance
- Fire and other damage to property insurance and proportional reinsurance
- General liability insurance and proportional reinsurance
- Income Protection insurance and reinsurance
- Marine, aviation and transport insurance and proportional reinsurance
- Miscellaneous financial loss
- Non-proportional casualty reinsurance
- Non-proportional health reinsurance
- Non-proportional marine, aviation and transport reinsurance
- Non-proportional property reinsurance
- Life reinsurance

The 10 most important geographic areas at 31 December 2023 were:

India, Japan, Bulgaria, Saudi Arabia, United Kingdom, Qatar, Switzerland, Angola, Oman and south Korea.

The subscribed capital remained at EUR 29,000,000.

AM Best has confirmed the stable outlooks and affirmed the Financial Strength Rating of A (Excellent) and the Long-Term Issuer Credit Rating of "a" (Excellent) of Barents Re Reinsurance Company, Inc. and its affiliate, Barents Reinsurance S.A.

The Credit Ratings (ratings) reflect Barents Re's balance sheet strength, which AM Best assesses as strongest, as well as its strong operating performance, neutral business profile and appropriate enterprise risk management.

On December 13, 2023 the Company was assigned an A3 standalone rating from Moody's with stable outlook, reflecting the strength of its standalone credit profile and strong explicit and implicit support by its ultimate parent, Barents Re Reinsurance Company, Inc.

It is also important to note that the Company's governance arrangements and operations have been significantly enhanced recently and the Company is going through a transformation programme that includes several changes at both the Board and management level. In addition to this, several appointments have been made to strengthen the Company's operations more generally.

A.2 Underwriting Performance

Financial results for the year-ended 31 December:

(All figures are in EUR '000)	Dec-23	Dec-22
Technical Account - Non-life Insurance Business		
Earned Premiums, Net of Reinsurance	34,834	27,771
A) Gross Premium Written	174,076	136,321
B) Outward Reinsurance Premiums	(135,769)	(108,501)
C) Change in The Gross Provision for Unearned Premiums	(15,242)	2,568
D) Change in The Gross Provision Unearned Premium, Reinsurance Share	11,769	(2,616)
Claims Incurred, Net of Reinsurance	(6,274)	(2,196)
A) Claims Paid	(5,758)	(2,731)
aa) Gross Amount	(68,897)	(28,090)
bb) Reinsurers' Share	63,139	25,359
B) Change in the Provision for Claims	(516)	534
aa) Gross Amount	(32,536)	(38,592)
bb) Reinsurers' Share	32,020	39,127
Net Operating Expenses	(35,186)	(27,346)
A) Acquisition Costs	(27,582)	(22,789)
B) Change In Deferred Acquisition Costs	2,186	433
C) Administrative Expenses	(18,344)	(12,530)
D) Reinsurance Commissions and Profit Participation	8,554	7,540
Other technical income, net of reinsurance (*)	17,689	11,691
Allocated Investment Return Tfd from Non-technical Account	(60)	3,928
A) Income from change in unrealised capital gains	(989)	4,115
B) Income from other investment	691	46
B) Value adjustments on Investments	238	(234)
Other technical charge, net of reinsurance	(120)	(255)
Taxes	(2,115)	(2,617)
Change in the Equalisation Provision	(8,767)	(10,975)

Profit or Loss for the Financial Year

(*) Other technical income represents 90% share of operating expense as per the QS agreement with Barents Re Group, in addition to other intragroup services income.

Barents Reinsurance S.A. 5 of 53

Barents Reinsurance S.A. underwriting performance for the year ended 31 December 2023 is set out below:

Key Performance Indicators	Dec-23	Dec-22
1. Gross Earned premiums (in EUR '000)	158,834	138,888
2. Gross Ultimate Loss Ratio (%)	64%	48%
3. Commission Ratio (%)	16%	16%
4. Expense Ratio (%)	12%	9%
5. Combined Ratio (%)	92%	73%
6. Net Income Before Equalization Reserve (in EUR '000)	8,767	10,975
7. Profitability Margin (%)	6%	8%
8. ROE (%)	30%	38%
9. Solvency Ratio (%)	189%	156%

In 2023, net income before equalisation reserve is driven by the technical results. The increase in gross earned premium is mainly driven by the increase in production for the Life line of business.

The increase in the gross ultimate loss ratio is due to large losses in the energy and surety line of business.

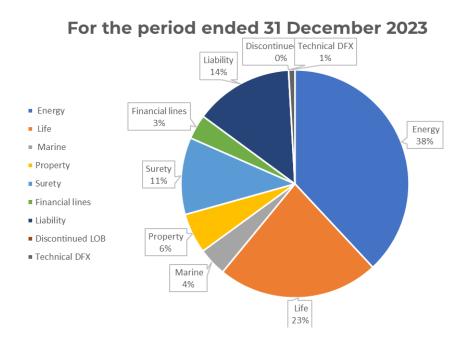

The increase in expense ratio is mainly driven by the several projects executed during 2023 to enhance the company's governance and operations.

Barents Reinsurance S.A. 6 of 53

A.2.1 Analysis of underwriting performance by lines of business

The lines of business which Barents Reinsurance S.A. underwrites and their relative contribution to gross earned premium are shown in the below table:

The Company's underwriting performance by lines of business for the year ended 31 December 2023 is set out in the table below:

Key Performance Indicators by LOB	Energy	Life & Health	Marine	Property	Surety	Financial lines	Liability	Total
1. Gross Written Premium (EUR '000)	65,429	47,654	6,420	12,268	15,560	5,436	21,308	174,076
2. Gross Earned Premium (EUR '000)	60,447	36,345	6,409	9,044	17,371	5,554	22,230	158,834 ¹
3. Gross Claims Incurred (EUR '000)	(42,570)	(30,609)	(6,330)	(1,800)	(27,137)	(2,697)	4,012	(101,433)1
4. Net Claims Incurred (EUR '000)	(792)	(3,013)	(374)	(244)	(1,935)	(231)	(62)	(6,274) ¹
5. Gross Ultimate Loss Ratio (%)	70%	84%	99%	20%	156%	49%	-18%²	64%
6. Commission Ratio (%)	16%	9%	25%	20%	42%	29%	0%	16%
7. Expense Ratio (%)	7%	5%	43%	29%	11%	53%	10%	12%
8. Combined Ratio (%)	93%	98%	166%	69%	209%	130%	-8%	92%

Barents Reinsurance S.A. 7 of 53

¹ Total column includes technical DFX representing the unrealized difference of exchange that was calculated based on the technical balance sheet figures as at 31 December 2023

² The negative gross ULR for liability is due to the release of IBNR.

A.2.2 Analysis of underwriting performance by geographic area

Dec 2023 (in Euro '000)	India	Japan	Bulgaria	Saudi Arabia	United Kingdom	Other	Total 2023
Gross written premium	38,464	24,887	14,970	12,514	11,994	71,246	174,076
Reinsurers' share	(32,378)	(24,151)	(7,877)	(9,569)	(9,533)	(52,261)	(135,769)
Net written premium	6,086	736	7,094	2,945	2,462	18,985	38,307
Gross Claims incurred	(22,839)	(113)	(9,007)	(1,751)	797	(68,521)	(101,433)
Reinsurers' share	20,550	30	8,146	1,589	(733)	65,577	95,159

Net Commission	(296)	99	(5,982)	(1,305)	(1,062)	(9,552)	(18,098)
Technical Results	3,501	752	251	1,478	1,463	6,489	13,935

Barents Reinsurance S.A. 8 of 53

A.3 Investment Performance

The composition of Barents Reinsurance S.A.'s investment portfolio is shown in the table below:

Composition (%)	2023	2022
Bonds & other fixed income securities	16%	3%
- Government bonds	10%	1%
- Corporate bonds	6%	2%
Shares and other variable yield transferable securities	1%	1%
Deposits with credit institutions	40%	42%
Cash at bank and in hand	43%	54%

A.3.1 Net Investment Income

Euro '000	2023	2022
Income from change in unrealised capital gains	(989)	4,115
Income from other investment	691	46
Value adjustments on Investments	237	(234)

A.4 Performance of other activities

There was no other material income and expenses incurred over the reporting period.

A.5 Any other information

- On October 31, 2023 the Board of Directors decided to discontinue surety business.
- The UK branch discontinued its underwriting activities and entered in supervisory run-off ("SRO") on November 1, 2023.
- Underwriting activities are now carried out entirely in Luxembourg.

Barents Reinsurance S.A. 9 of 53

B. System of Governance

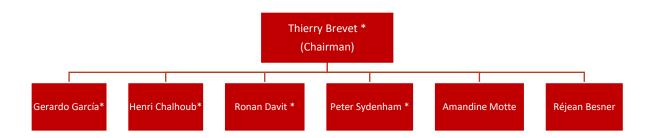

B.1 General information on the system of governance

The Board is collectively responsible for delivering the long-term success of Barents Re, and for compliance with the prevailing laws, regulations, and administrative provisions adopted pursuant to prudential regulation. Meeting at least four times a year, it operates within an established Corporate Governance Charter, under which it retains ultimate responsibility for all aspects of the Barents Re's operations. Certain matters are reserved specifically for decision by the Board, to ensure the prosperity of Barents Re by collectively directing the company's affairs, whilst meeting the appropriate interests of its shareholders and relevant stakeholders. Other matters are delegated to the Board's Committees, in accordance with a set of prescribed Terms of Reference, each of which is detailed within the Corporate Governance charter.

The Board and Committee structure is as below (as of 2 April 2024)

Board Membership (as of 2 April 2024)

* Non- Executive Director

In January 2023, Ronan Davit and John Harbor joined the Board as independent non-executive directors. Peter Sydenham joined the Board as an independent non-executive director in April 2023. In March 2024, Mr. Harbor resigned as a director of the Company. Amandine Motte, the Company's CEO and dirigeant agréé became an executive director of the Company in February 2024. Réjean Besner, the Company's actuarial key function holder and dirigeant agréé (subject to the non-objection of the CAA) became an executive director of the Company in March 2024 (subject to the non-objection of the CAA).

The Company has a Corporate Governance Charter that is designed to facilitate the proper functioning of the 'Three Lines of Defence' model across the entirety of the business. This model provides a recognised system of risk management and internal controls, combined with a mechanism for assessing and monitoring operational effectiveness.

Barents Reinsurance S.A. 10 of 53

B.1.1 Board

The Board is collectively responsible for the company's performance and long-term success. To carry out its responsibilities effectively, the Board retains decision making responsibility for the following key issues:

- Strategy
- Corporate Culture
- Capital Management and financing
- Financial reporting, Controls, and Investments
- Compliance, Risk Management and Internal Control Framework
- Actuarial and Reserving

B.1.2 Audit Committee

This is a Committee of the Board, whose responsibilities include the review of, and challenge to:

- Financial Reporting
- External Audit
- Internal Audit

B.1.3 Risk Committee

This is a Committee of the Board, whose responsibilities include the review of, and challenge to:

- Risk Management
- Actuarial
- Compliance

B.1.4 Remuneration Committee

This is a Committee of the Board whose responsibilities include recommendations for:

- Board changes relating to new appointments, structure, size, and / or composition
- Succession Plans
- A suitable performance framework and Remuneration Policy
- Compensation practice alignment with the business strategy, company objectives / corporate values

B.1.5 Executive Committee

This is a management committee responsible for management and oversight of the day-to-day business activities. The areas for which the committee has management and oversight responsibility includes:

- Financial Performance (including Investment)
- Underwriting Strategy (including Retrocession)
- All business support functions
- New business opportunities
- Actuarial and Reserving
- Information Technology Framework
- Legal & Compliance.

B.1.6 Solvency II Key Functions

Key functions, appointed by the Board of Directors, are one of the pillars of the organisational structure of Barents Re and contribute to the strategic objectives of the organisation, and the proper conduct of its operations. The composition, role and responsibilities and the reporting line of each function is detailed in the document below. The appointment of the person or persons responsible for representing each function is in accordance with the principles of management of conflicts of interest, and with the fit and proper requirements.

Risk Management Function

Barents Re has a risk management function that manages a centralised, robust and suitable risk management system, adapted to the risk profile (short, medium and long-term) of the organization.

Compliance Function

The Compliance function's role and purpose includes the advising of senior management and the Board of Directors on compliance with applicable laws, regulations and administrative provisions. The Compliance function is responsible for assessing the adequacy of Barents Re's framework and controls to prevent non-compliance. The Compliance function exercises its duties and responsibilities under the oversight of Barents Re's Board of Directors as per the Compliance Policy and the annual Compliance plan. The Compliance function assesses the impact of any changes in the legal environment on the operations of Barents Re and ensures its compliance framework of policies and procedures is updated accordingly.

Actuarial Function

Barents Re has an actuarial function to oversee all actuarial calculations needed for the Company's management, and to contribute to the risk management process with a mathematical and actuarial approach.

Internal Audit Function

Barents Re has an internal audit function to independently verify the adequacy of the organisational processes, compliance with prevailing procedures / processes, and their application in daily management.

B.1.7 Changes to the governance system during the reporting period

The Board of Directors decided to separate the Audit and Risk Committee into two distinct committees; the Audit Committee and the Risk Committee. It was also decided that the Investment Committee would cease being a separate committee and that investment matters would instead be dealt with at Risk Committee level.

Barents Reinsurance S.A. 12 of 53

B.2 Fit and Proper requirements

B.2.1 Fit and Proper Policy

Barents Re maintains a Fit and Proper Policy which articulates the basis upon certain individuals must demonstrate:

- 1. Their knowledge, skills, and experience are adequate to ensure sound and prudent management (Fit) continues; and
- 2. They carry out their responsibilities with integrity and good repute (Proper) at all times.

The Policy applies to all Board Directors / Committee Members, Management Committee Members, and Key Function Holders, who collectively represent the Barents Re's senior management. New senior management appointments are subject to individual assessments dependent upon the role being undertaken, and thereafter, are subject to an annual assessment of fitness & propriety, in keeping with the requirements of the Fit & Proper Policy. This is to evidence that all aspects of the management of the Barents Re are, and remain, suitable on an on-going basis.

B.2.2 Fit and Proper assessment process

The annual process is designed to demonstrate the continued suitability of senior management, based on assessments against suitable standards. These standards include:

- Evidential Honesty & Integrity within the working environment
- Individual and collective performance
- Continued financial soundness
- Skills & knowledge enhancements through personal development
- Conflict Management

B.3 Risk management system including the own risk and solvency assessment

The purpose of Enterprise Risk Management is to ensure risk is appropriately managed within the firm by achieving the acceptable balance of risk and reward, through a suitable culture and governance. It is integrated within each area of the business.

The Risk Management Policy sets out the company's Risk Management Strategy as well as the system and framework that is used to ensure that is aligned to the business strategy. The policy helps ensure that:

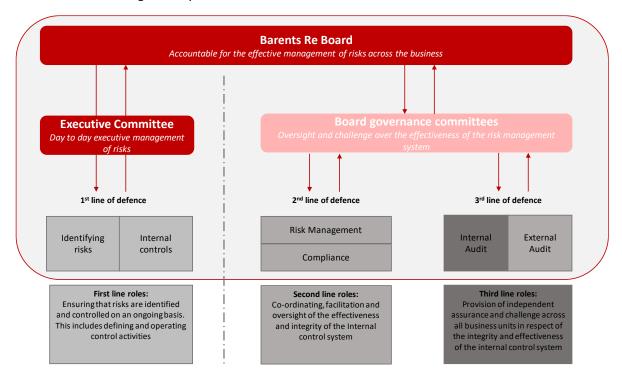

- There is a controlled risk-taking environment
- There is a consistent mechanism to identify, measure, monitor, manage, and report on, on a continuous basis, risks across the business
- There is appropriate risk governance in place with accountability correctly apportioned
- The level of risk taken is known and understood across the business and that the risk appetites set are being adhered to
- Information is made available, transparent and appropriate for the assessment of risk and reporting and monitoring

Barents Reinsurance S.A. 13 of 53

B.3.1 Risk management system

Barents Re's risk management system is based the three-lines-of-defence model.

First line of defence:

The first line of defence is the operational management having ownership, responsibility and accountability for directly assessing, controlling and mitigating risks. The relevant functions are Underwriting, Claims, Compliance, Finance, Technical Accounting, HR, IT, Actuarial, Investment Management and Retrocession Management.

Second line of defence:

The second line of defence consists of the Risk, Compliance and Actuarial functions. Between them, they monitor and facilitate the implementation of effective risk management practices by operational management and assists the risk owners in reporting adequate risk-related information up and down the organisation.

Third line of defence:

The third line of defence consists of the Internal Audit function. This function provides independent assurance to the Board of Directors and senior management on the effectiveness of the first and second lines of defence. In addition to the Internal Audit function, the external audit process provides independent assurance on certain key items including opining on Barents Re's financial statements.

Barents Reinsurance S.A. 14 of 53

B.3.2 ORSA

The Own Risk and Solvency Assessment (ORSA) is the process which identifies and assesses all material risks that may impact the Barents Re over the full strategic planning period, to allow for sufficient capital to be maintained (on a continuous basis) to meet those risks and obligations. The assessment of risks and capital is an 'own view' by the firm rather than a process to assess regulatory capital (that is the SCR process).

Assessments are required to be forward-looking taking into account the business plan, projections and assumptions made and set out the key conclusions and actions required (as appropriate). The financial projection is performed based on:

- the best estimate scenario of the business plan,
- stress scenarios based on the key risks identified during the risk survey,
- potential additional scenarios which might be relevant,
- at least one reverse stress scenario which would lead to a depletion of eligible own funds.

Inputs for the ORSA are also used for the business plan which is used to project the Solvency II balance sheet, the Solvency Condition Report and Minimum Capital Requirement over the next five years.

Barents Re performs the ORSA at least annually. Nonetheless, events that would trigger the need for an ORSA outside of the regular timescales are, for example:

- material changes to the business plan,
- material changes to the Barents Re's risk profiles,
- extreme loss events having an impact on the Barents Re's capital level,
- material changes to Barents Re's retrocession and / or shareholder structure

The ORSA report is submitted to the CAA after board approval annually.

The Company has determined that the Solvency II Standard Formula is appropriate to calculate the required solvency capital needs. The Standard Formula employs a mathematical model that provides a risk-based framework to determine appropriate levels of capitalisation.

At this stage, there are no reasons to believe that the Barents Re's risk profile significantly deviates from the underlying assumptions of the Standard Formula. This assessment will be reviewed in future reporting years.

B.4 Internal control system

B.4.1 Internal Control System

The internal control system is the framework through which Barents Re implements and maintains a suitable and effective internal control system and provides assurance of compliance with all regulatory requirements. Effective internal controls help to mitigate against material risks, thus maintaining risks within the agreed appetite levels. It is designed to ensure that Barents Re:

- operates in a manner which is effective and efficient to achieve its business objectives
- can produce reliable financial and non-financial information
- complies with applicable laws and regulations
- promotes management accountability for controls
- has a continuous and ongoing process for the identification, assessment and monitoring of risks and controls

The Board has ultimate responsibility for ensuring that Barents Re has an effective and proportionate internal control framework which enables risks to be assessed and managed on an ongoing basis. Day-to-day responsibility for control oversight responsibilities lies with the Compliance, Risk Management and Internal Audit Functions. Each head of function within the 1st line of defence is responsible for ensuring controls operated by their function are effective, operating as designed and that staff adhere to agreed and documented procedures.

The internal control system includes internal controls at different levels of the organisational and operational structure, and at different time periods. Control activities include but are not limited to approvals, authorisations, verifications, reconciliations, management reviews, exceptions monitoring and peer reviews.

Internal controls are currently being enhanced and centrally reviewed by the Risk Management and Compliance functions. The review and second line monitoring shall test and challenge the adequacy of the Barents Re's internal control system given the nature, scale and complexity of its activities. Ongoing monitoring and reporting to senior management and the Board by all relevant functions shall ensure that Barents Re is able to evidence a robust system of governance.

B.4.2 Implementation of the Compliance function

The Board mandates the Compliance function to support the effective management of Barents Re's compliance obligations in order to reflect the compliance risk appetite defined by the Board, protect the Company's long-term ability to achieve its objectives, meet its stakeholders and customer expectations, withstand supervisory scrutiny and prevent any adverse effects of non-compliance.

The Compliance function is responsible for:

- Establish, implement, and maintain a full suite of compliance policies and procedures, an annual
 compliance risk assessment, an annual compliance plan and a second line monitoring program and
 reporting framework which is subject to review and support by the Executive management and approval
 of the Board;
- provide the Executive management with compliance reports detailing the results, identified control failings and agreed mitigating actions resulting from the Compliance Monitoring Plan

Barents Reinsurance S.A. 16 of 53

- Overseeing as well as providing appropriate training and support to relevant business functions to establish, implement, and maintain first line compliance controls;
- Providing primary assurance oversight covering compliance with the Code of Conduct and internal policies and standards in relation to Compliance Risks

The specific areas of Compliance Risk within the scope of Compliance's core responsibilities include: Money Laundering and Terrorist Financing; Bribery and Corruption; Fraud; Conduct Risk; Conflict of Interest; Data Protection.

The Compliance function is operationally independent with regular and timely interaction and direct access to the Board of Directors, management team, and governance committees of the Company.

B.5 Internal Audit function

The Internal Audit function provides independent assurance to the Board of Directors and Audit Committee on the effectiveness and adequacy of the processes for risk management, internal control, and governance, and will furnish management with analysis, recommendations, counsel, and information focused on advancing the goals and objectives of the company. The role of the Internal Audit function is to:

- Establish and maintain a risk-based annual Internal Audit plan that is approved by the Audit Committee
- Execute audit engagements based on the annual and approved Internal Audit plan
- Issue Internal Audit reports to the Audit Committee
- Submit quarterly activity reports to the Audit Committee
- Follow up on the implementation of outstanding Internal Audit recommendations
- Assess the soundness of the risk, internal control and governance frameworks
- Ascertain compliance with applicable laws and regulations, and the Barents Re's policies and procedures
- Review operations or programs to assess whether they are being carried out as planned and whether results are consistent with established objectives
- Inform and advise senior management and the Audit Committee as to significant deficiencies or other substantive issues noted in the course of its activities
- Communicate the final internal audit reports to external auditors at the commencement of the annual external audit exercise

The Internal Audit function has no direct executive responsibility or authority over any of the operations reviewed. It does not create and / or implement procedures, prepare records, or engage in any other activity that it would normally review and assess, that could reasonably be interpreted to compromise its independence and objectivity.

A risk based annual internal audit plan is submitted by Internal Audit to the Audit Committee for approval, to provide assurance to the Board about all areas of Barents Re's risk profile and operating model.

To effectively discharge its responsibilities, the Internal Audit function has unrestricted access to all records, properties, functions and personnel, relevant to its scope and the subject under review. All operations of Barents Re fall within scope of the Internal Audit function and are catered for in its annual assessment exercise from which the annual audit is derived. Any scope limitation is communicated in writing to the Audit Committee.

The Audit Committee is responsible to the Board for the oversight of the Internal Audit function, including:

- o To oversee the Barents Re's relations with the internal auditor and consider and make recommendations to the Board on their appointment or removal. If new appointees are to be sought, the Committee shall oversee the selection process;
- o To assess the qualification, expertise and resources, independence, objectivity, and effectiveness of the internal auditor
- o reviewing and recommending the annual Internal Audit plan for approval
- Reviewing all internal audit reports and other assurance reports that may be commissioned periodically.
- o Monitoring and assessing the role and effectiveness of the Internal Audit function in the overall context of the Barents Re's risk management system
- o To review at every meeting progress against the internal audit plan;
- o Meeting regularly with the Head of Internal Audit without the members of the executive team being present

B.6 Actuarial function

The actuarial function acts in different capacities at different stages alongside the risk management function. Its responsibilities extend to managing or providing technical support for the calculation of technical provisions, capital, advising on the underwriting policy and reinsurance arrangements, in addition to its contribution to optimising the risk management system. The main responsibilities are:

- Independently assessing the adequacy of the technical provisions using appropriate methodologies and underlying assumptions that are applicable to the lines of business written.
- Assessing the sufficiency and quality of the data used in the calculation of technical provisions.
- Providing an opinion to the board on the underwriting policy.
- Providing an opinion to the board about the reinsurance arrangement of the business.
- Ensuring compliance with the European actuarial guidelines issued by EIOPA with respect to the actuarial methodology and techniques used in determining technical provisions.

B.6.1 Coordination of Technical provisions

The Actuarial function performs an independent valuation of the Unearned Premium Reserve (UPR) and will assess the necessity for additional reserves for unexpired risks. IBN(E)R reserves (gross reserves and retro share) are calculated on a quarterly basis by the Actuarial Function, using input provided by the Finance Function. The input consists of a list of technical data by policy which also forms the basis for the technical part of the income statement.

The underlying actuarial assumptions are updated annually, using Barents Re data as well as market information published by e.g. Swiss Re, Axis Capital Holdings, Everest Re and Validus Group.

Final approval of all actuarial estimates including IBN(E)R reserve estimates is with the Reserving Committee.

Barents Reinsurance S.A. 18 of 53

Data Quality

The Actuarial function carries out an assessment of the quality of data being used in the calculation of reserves and technical provisions. The data quality policy discusses the frequency, validation criteria and reporting requirements. The data quality assessment assesses the completeness, accuracy and appropriateness of the data being used for the reserving analysis and reports on any areas of uncertainty or limitations of the data used.

B.6.2 Pricing and Product Management

The Actuarial function oversees the pricing models and benchmarks to assess the price adequacy and economic combined ratio of each transaction, and the portfolio bound during a quarter. Pricing is based on:

- Estimates of the expected loss
- Tax and commission payments
- Administrative expenses
- Cost of capital and retrocession

A report on bound and quoted business is produced on a quarterly basis in order to allow senior management and the underwriters to assess the overall quality of underwritten business, and its development over time.

B.6.3 Actuarial Function Report

The Actuarial Function produces an actuarial function report to the Board in accordance with the European Standard Of Actuarial Practice 2 (ESAP 2) "Actuarial Function Report Under Directive 2009/138/EC".

B.7 Outsourcing

B.7.1 The Outsourcing Policy

The Outsourcing Policy sets out the governance framework for the management and oversight of outsourcing and non-outsourcing third-party arrangement, in keeping with regulatory requirements and industry best practice. It covers all types of outsourcing and third-party arrangements, which includes sub-contracting and intragroup arrangements. The policy itself defines the key phases of the life cycle of any arrangement falling within the ambit of the policy. Each phase is subject to a specific set of procedural requirements, to ensure that the appropriate scrutiny and management of any arrangement is effective and can be appropriately evidenced, both at the time of due diligence, and during the life cycle of the arrangement.

The key phases are:

- Pre-agreement due diligence, including an assessment of whether the arrangement is deemed a 'material' arrangement (and subject to enhanced process requirements)
- Effective monitoring and management of risks during the life cycle of an arrangement
- Considerations prior to implementing contract change amendments, which includes additional due diligence checks and / or monitoring enhancements, to reflect the specific nature of any contract change
- Exit strategies and contract termination, to ensure there are no outstanding matters at the point of exit or termination

Barents Reinsurance S.A. 19 of 53

The Board is ultimately responsible for ensuring that the outsourcing framework is in keeping with regulatory requirements. Adherence to the policy and its underlying process, is monitored by Operations, with Risk Management and Internal Audit providing the Board with independent assurance on the continuing effectiveness of material outsourcing arrangements.

To establish whether any arrangement is considered 'material' the company uses the following assessment criteria.

Categories	Significant impact descriptors	Significant impact thresholds
Regulatory	If services are not performed to meet regulatory and / or legal requirements in any of the jurisdictions that the company conducts business in	 Requires an incident to be reported to a regulator Potential for regulatory fine
Operational	Service failure exceeding the impact tolerances for the substitution of the recovery of the service, resulting in customer detriment and inability to continue providing important services	 Reportable conduct issues Risk of customer complaints Inability to recover / substitute service in line with impact tolerances
Financial	The financial impact to the business including the risk to the ongoing solvency of the company or material impact on assets, capital, or liquidity	 Impact on the business plan and / or profitability Impact on solvency position
Data protection and Data quality	Service failure could result in loss of business, employee, or customer sensitive data, posing an increased risk of fraud or financial crime	 Mishandling or loss of customer data Reportable breach to the regulator Inability to recover data Material data inaccuracies or lack of timely reporting
Reputational	Reputational damage to the company as a consequence of service failure which can be attributed to any of the above	Unfavourable media coverage and / or increased regulatory scrutiny

As per Article 294, paragraph 8, of Delegated Regulation 2015/35, below is the list of critical or important operational functions or activities that are outsourced by the company:

Outsourced critical service / activity	Service Provider	Territorial jurisdiction	Overview and comments
Claims management	Barents Risk Management Ltd. (BRM)	Lebanon	This outsourcing is ending on 30 June 2024, after which the claims management function will be handled internally
Retrocession management	Barents Re Reinsurance Company, Inc. (Barents Cayman)	Cayman Islands	Barents Cayman provides retro management support services to the company, overseen by the CEO and the underwriting team
Management of the Policy Administration System	Eurobase	UK	Eurobase provides the company with the main platofrm for policy administration. The materiality of this contract will be reassesed in 2024
Provision of physical servers	DADE2	Iceland / Germany	DADE2 provide the company with physical servers to store all company data. The materiality of this contract will be reassessed in 2024

B.8 Any other information

The governance system of Barents Re is in line with the complexity of the risks inherent in its business.

In an effort to mitigate the risks associated with the outsourcing of critical functions to Barents Risk Management Ltd ("BRM") and following recent lingering performance issues with several of these outsourced functions, the board of Barents Reinsurance SA ("Barents") has decided to stop its outsourcing relationship with BRM by 30 June 2024.

All critical outsourced functions will be moved internally by hiring resources in the Barents Luxembourg office (including Claims and Technical Accounting). A 3-month period of handover from BRM to Barents will be conducted in Q2 2024.

Non-critical functions are outsourced to a new affiliated entity (Pleiad) in the UK with offices in Europe. These services will be overseen by managers in Barents. The contractual relationship with the new entity will be established by April 2024. An evaluation of this contractual relationship in March 2024 deemed it to be a non-material outsourcing arrangement.

Barents Reinsurance S.A. 21 of 53

C. Risk Profile

Barents Re risk profile is analysed based on the Solvency II standard formula, and each contract has been allocated a Solvency II class of business based on the underlying coverage and type of contract.

Barents Re risk profile has a material counterparty default risk exposure driven by internal and external reinsurance retrocession. The second material risk exposure is non-life underwriting risk, mainly driven by the non-life catastrophe due to the exposure to high severity – low-frequency losses in our portfolio.

The risk profile of the business continues to evolve. The sections below provide analysis of the risk profile of the business This will also draw links to the risks noted in the risk map and quantified using the standard formula model.

C.1 Underwriting risk

C.1.1 Risk Description

Underwriting risk is explicitly modelled within the risk profile. Underwriting risk is defined as the risk that insurance premiums will not be sufficient to cover future insurance claims and associated expenses. Barents Re writes a book of reinsurance predominantly on a facultative basis. The portfolio concentrates on the protection of primary insurers excluding USA and Canadian risks unless the coverage is incidental to the main risk. The portfolio also seeks to avoid exposures located in territories where the risk of catastrophes caused by natural perils is considered to be high. The underwriting risk (Insurance risk) profile has increased driven by exposure increase in premium volumes year-on-year. This has increased the overall premium and reserve risk exposures since the prior year.

Underwriting risk is likely to increase in line with the business plan and business strategy in the medium to long term, as Barents Re grows its existing lines of business. The Risk Management function will continue to review underwriting controls including the portfolio management framework to ensure that controls remain appropriate for the size and complexity of the business for effective management of risks.

Reserve risk is defined as the risk of unsuitable case reserves (for example, over or under reserving) and/or insufficient technical reserves in place to meet incurred losses and associated expenses. Barents Re makes financial provisions for unpaid claims, legal costs, and related expenses to cover liabilities both from reported claims and from 'incurred but not reported' (IBNR) claims. Insufficient reserves could adversely impact Barents Re's future earnings and capital.

The booked IBNR reserves includes a provision for adverse deviation to account for insufficient data experience and reliance on external benchmarks.

Reserving risk is currently stable given the prudent approach to reserving. It will continue to be managed using the same approach.

C.1.2 Risk Mitigation

Barents Re purchases Excess of Loss retrocession protection on particular programmes to mitigate the impact of catastrophic claims and/or to manage accumulations of risk. In addition, Quota Share reinsurance is in place to mitigate the impact of attritional losses.

Barents Reinsurance S.A. 22 of 53

In addition, the Company uses a range of techniques to manage this risk as set out below:

- Underwriting Authority Letters are the primary tool for defining and implementing underwriting risk
 preferences and limits. The Authority Letters are consistent with established underwriting strategy
 and guidelines and detail an underwriter's ability to legally bind contracts on behalf of the Company.
 The underwriting process is supported by pre and post-bind peer reviews, the framework and
 reporting of which is overseen by the Underwriting Committee.
- The Company has established a framework to enable the business to regularly assess and monitor performance drivers on a portfolio basis.
- The claims team performs regular reviews of emerging claims trends. The claims team meets with underwriting teams regularly to provide feedback on specific losses and identified trends to inform risk selection and coverage considerations.
- Underwriting Guidelines are documented for each class of business, including maximum line sizes, accumulation limits for single events and risk preferences. The risk profile of each class of business is regularly monitored against these guidelines. Material variations are reported to the relevant Committee, where remediation actions are considered.
- The actuarial function maintains a best estimate reserving process that integrates planning, pricing and exposure information to establish a feedback loop between the reserving and underwriting processes.

C.1.3 Measures used to assess risk

Barents Re uses several internal tools to assess the risk, pricing and reserving relies on in-house solutions with outputs benchmark with external data, and the Solvency capital calculations.

C.1.4 Risk Concentration

Notwithstanding the comments made in the above section, the portfolio is still exposed to the concentration of risk (across counterparties, industries, and geographic locations). In this regard, the risk is managed through the licensing of RMS and Xuber which are both proprietary exposure management tools.

Underwriting reviews are carried out by third parties. The control environment will continue to be further developed and enhanced as part of the Internal Control implementation project.

C.1.5 Stress and Sensitivity Testing

Stress and scenario testing is carried out as part of the ORSA process, which is conducted at least annually. These tests consider moderate as well as extreme but plausible stresses and assess the impact on Barents Re's capital position.

C.1.6 Material changes over the reporting period

Underwriting risk (Insurance risk) exposure is stable during the reporting period.

C.2 Market risk

C.2.1 Risk description

Barents Re chooses to assume market risk in order to optimise the return on assets while ensuring that funds are available to pay claims when required. Market risk is the threat of unfavourable or unexpected movements in the value of Barents Re's assets and/or the income driven by movements in market prices (e.g. generating negative investment returns). Within the Risk and Control Register, market risk is sub-categorised into (i) Asset liability matching, (ii) Interest and exchange rate and (iii) Asset concentration, (iv) Investment counterparty default.

Market risk is assessed using risk parameters in the SCR models, stress and scenario testing and reverse stress testing. The modelling tool that is used allows a measurement of actual exposure against parameters that articulate the amount of risk it is prepared to accept.

Barents Re writes business in different currencies while its denominated currency is Euros. As a result of this, the company is exposed to foreign exchange risk. The risk is assessed and managed by the finance function. In addition to this, the Board of Directors provides oversight. It's important to note that Barents Re does not actively seek to generate investment returns by taking positions on currency movements.

Market risk has increased due to an increase in business written in USD and INR. This is due to the current macro-economic context which benefits the business but has an overall impact on the capital requirements. There are no material concerns with the performance of this risk and it will continue to be monitored.

C.2.2 Investment management in accordance with the 'Prudent Person' Principle

The Prudent Person Principle is embedded in Solvency II and is used to guide Barents Re's investments.

Barents Re invests in assets and instruments that can be properly identified, measured, monitored, managed, controlled, and reported on. They are invested in a manner to ensure the security, quality, liquidity and profitability of the portfolio, and such that they are available to the company in the relevant currency as required. Assets held to cover technical provisions are also invested in a manner appropriate to the nature and duration of Barents Re's liabilities. They are invested in the best interests of all stakeholders, taking particular account of Barents Re's customers.

C.2.3 Key Mitigating Controls

Barents Re has established controls to manage and mitigate its key market risks.

The Company manages market risk through both a system of limits and a strategy to optimise the interaction of risks and opportunities, both of which are documented in an investment management policy.

The Company maintains an asset liability management strategy that involves the selection of investments with appropriate characteristics, such as duration, yield, currency and liquidity that are tailored to the anticipated cash outflow characteristics of our liabilities and the anticipated interest rate environment.

Investment Guidelines are structured to ensure sufficient liquidity and prevent over exposure to any one risk sector.

Examples of some key controls in place for place for Barents Re's market risks include:

- 1. Minimum cash limits; and
- 2. Investments performance report.

Barents RE has a minimum amount of cash that must be retained at all times. This helps to ensure planned and unforeseen liabilities can be covered in a timely manner, without impacting the investment portfolio.

Barents Re uses external investment advisors to support on the management of its portfolio. They provide regular updates on performance, which is reported to Barents Re's management.

Assets are diversified in such a way that there is no over reliance on, or concentration of risk in, any particular asset, issuer, group of undertaking, geography, asset class or other risk.

C.2.4 Risk Concentration

Concentration risk arises when too much exposure is held in assets which respond to similar risk factors. Assets are diversified in such a way that there is no over reliance on, or concentration of risk in any particular asset, issuer, group of undertaking, geographical area, asset class or other risk attributes.

The majority of assets held by Barents Re are cash and short term deposit. In the bond portfolio, the largest exposures are in respect of European government bonds and corporate bonds issued in Euros.

C.2.5 Material changes over the reporting period

No material changes in the market risk profile during the period.

C.3 Credit risk

C.3.1 Risk Description

Credit risk is defined as the risk of loss or adverse financial impact due to default by counterparties to which Barents Re is exposed. Reinsurance credit risk and broker credit risk are both explicitly modelled within the risk profile.

The inherent credit risk exposure for Barents Re is material with a Whole Account Quote Share treaty with the parent company Barents Re Group. Additionally, Barents Re Group provides Barents Re with Stop Loss cover.

Credit risk will remain stable in the medium to long term horizon given the business strategy focused on organic growth. Additionally, there will be no material changes to the underlying reinsurance strategy.

C.3.2 Key Mitigating Controls

Barents Re is strengthening the controls to manage and mitigate its key credit risks. These controls include:

- o A Quarterly recoverables report
- o Reinsurance counterparty limits
- Counterparty Security Ratings
- Bank exposure monitoring

To reduce credit risk exposure to reinsurers, Barents Re has limits in place to manage exposures to reinsurers based on their credit rating. Barents Re can also request collateral to be held from reinsurers, which can be used to pay claims if the reinsurer is downgraded, or it defaults on its obligations.

Broker credit risk is also closely managed and monitored for due and overdue premium.

C.3.3 Measures used to assess risk.

Barents Re's exposure to credit risk is represented by the values of financial assets and reinsurance assets included in the balance sheet at any given point in time. Barents Re's gross receivables are exposed to the underlying internal intermediary's broker credit risk.

Reinsurance credit risk and broker credit risk are both explicitly modelled within the risk profile.

C.3.4 Risk Concentration

The concentration of credit risk exposures held by insurers may be expected to be greater than those associated with other industries, due to the specific nature of reinsurance markets and the extent of investments held in financial markets. Exposures are diversified as far as possible, in order to avoid the concentration of reinsurers, bonds issuers, brokers or other counterparties.

C.3.5 Stress and Sensitivity Testing

Due to the high level of reinsurance ceded, Barents Re is exposed to a material amount of counterparty default (credit risk). As one of the Company's most material risks, a downgrade of the Company's retrocessionaires was considered as a scenario. In this scenario it is assumed all retrocessionaires ratings are downgraded to "BBB+". Under this stress scenario, the Company is able to withstand the shock of the downgrade whilst maintaining its SCR ratio above the risk appetite requirement of 120% SCR coverage ratio.

C.3.6 Material changes over the reporting period

There have been no material movements in the management of the credit risk at Barents Re during the current period.

C.4 Liquidity risk

C.4.1 Risk Description

Liquidity risk arises from the need to pay insurance claims and other liabilities, which may have an uncertain timing or quantum. Barents Re has to balance the liquidity of assets with the return and the quality.

The characteristics of liquidity risk mean that it should be viewed across three different time horizons:

- Short-term cash required in the coming months to cover normal trading activity including payment of known claims, expenditure, and salaries;
- Medium-term cash required to meet medium-term funding requirements including tax and dividend payments and planned project and capital expenditure; and

Barents Reinsurance S.A. 26 of 53

• Long-term – cash required to support the longer-term ambitions of Barents Re including underwriting capital to meet growth ambitions and funding to support potential future stress scenarios such as catastrophe losses.

C.4.2 Key Mitigating Controls

Barents Re has established controls to manage and mitigate its key liquidity risks that include:

- Minimum cash limits
- Cash-Flow projections and the monitoring of them
- Solvency II monitoring and quarterly projections

C.4.3 Expected profit included in future premiums

The expected profit included in future premiums is EUR 5.5m This represents the profit that is expected to materialise from contracts which have been bound by Barents Re but the company is yet to go through the risk exposure period to which the premium relates.

C.4.4 Risk Concentration

Barents Re's liquidity risk concentration is managed by holding assets with a variety of approved banks, bond issuers and credit institutions.

C.4.5 Stress and Sensitivity Testing

Barents Re's sources of cash inflows typically are premiums, returns on investments and cash from maturing investments or investment disposals and reinsurance payments. In normal circumstances, total inflows should be higher than expected outflows. In case of a reduction of QS together with a downgrade of the credit rating of the banks holding Barents Re's cash deposits, SCR ratio would be affected in the long run but the mitigation actions in place are considered adequate to manage the risk.

C.4.6 Material changes over the reporting period

There have been no material movements in the management of the liquidity risk at Barents Re during the current period.

Barents Reinsurance S.A. 27 of 53

C.5 Operational risk

C.5.1 Risk description

Operational risk is the risk of direct or indirect loss resulting from internal processes, people or systems, or external events. Operational risk is measured using risk assessments and the standard formula.

Risk Type	Risk Group	Risk Title	Risk Description
	Business process risk	Finance operations	The risk of inappropriate and ineffective finance processes including: - errors due to manual work when processing information from the underwriting system - lag in processing of collections and receivables - Incorrect technical bookings from underwriting system
	Business process risk	Expense management	The risk that operational expenses might materially hexceed the budget thus impacting profitability.
	Business process risk	Failure of technical accounting	The risk of failure of technical due to: - Incorrect technical bookings - accounting software
	Data risk	Risks written but not recorded	The risk that risks are underwritten but not recorded in underwriting systems, resulting in unknown and non-reinsured accumulations.
isk	Financial reporting risk	Financial misstatement	The risk of incorrect, unrealiable or poor quality financial reporting which does not meet applicable accounting standards and financial reporting regualtory requirements. This could result in: - Errors in regulatory reportings - Missed deadlines
<u>a</u>	Information Security Risk	Data loss or disclosure	The risk of unintentional data loss or disclosure by employees due to inadequate systems/ applications and hardware security.
ion	Information Security Risk	Secure applications	The risk that security principles are not embedded in applications lifecycle resulting in vulnerabilities
Operational Risk	Other	Inadequate IT infrastructure / system availability	The risk of operational failure of infrastructure / applications or end-user managed technology affecting the performance or availability of infrastructure / applications.
Ŏ	People risk	Lack of appropriate skills / capability	The risk of loss / lack of appropriate skills and capability leading to forgone revenues / errors and impacting overall ability to compete with market peers.
	People risk	Inappropriate behaviour / culture	The risk of inappropriate behaviour and culture resulting in decisions which are not aligned with the corporate values and strategy.
	People risk	Inability to attract / retain staff	The risk that the business fails to attract and retain staff impacting the ability to implement normal day to day business processes.
	People risk	Operational HR processes	The risk of ineffective management of key HR processes e.g. recruitment, performance, management and / or managing payroll.
	People risk	Personal injury or death during work	The risk of a safety incident due to a failure in processes and procedures in health and safety.
	People risk	Loss of underwriting team	The risk of losing a key underwriter and / or the whole underwriting team.
	Resilience	Business resilience	The risk of ineffective response to a major incident due to lack of a robust and fully tested Business Continuity Plan / Disaster Recovery Plan.
	Third party risk	Failure to manage outsourcing arrangements	The risk of inadequate due diligence process for third party selection process and ongoing oversight monitoring process thus impacting business processes.

C.5.2 Key Mitigating Controls

Below is a summary of the mitigating controls for the different components of operational risk:

- People risks
 - Training and development
 - Benefits and Remuneration review
- System risks
 - IT Disaster Recovery
 - Data back-up
 - Systems access controls
 - IT security (e.g., firewalls, email scanning and content filters)

Barents Reinsurance S.A. 28 of 53

- IT security training (e.g., phishing, best practices)
- Process risks
 - Appropriate segregation of duties across all functions
 - Four-eyes oversight of all key areas
 - All outsourced arrangements conducted under formal agreements and in accordance with the Outsourcing Policy
 - Business continuity plan (BCP) testing

C.5.3 Measures used to assess risk

Operational risk is measured using the standard formula, and Barents Re projection tool to measure the risk profile changes, which measures risk exposure against Board approved risk appetite. Stress testing and scenario analysis also includes operational risks.

Through the Risk & Control Self-Assessment (RCSA) framework, each risk owner is responsible for assessing the design and operating effectiveness of their control environment, and, to the extent any gaps or deficiencies exist, assessing the corresponding impacts and level of operational risk / exposure to the company.

Operational risk and near miss events are also reported to the risk function for analysis and to understand the root cause of each event. These are also reported to the Barents Re Risk Committee

C.5.4 Risk Concentration

The Company offers remote working capabilities therefore limiting the risk of reliance on physical offices to trade. Nevertheless, both DR and BCP plans are in place.

The Personal Development Review process and training and development programme aims to manage talent in order to reduce single person dependencies on key people as well as staff turnover. Documentation of policies and procedures also limits the reliance on specific individuals.

C.5.5 Stress and Sensitivity Testing

The Company has analysed its operational risk exposure and considers that any foreseeable operational event would not have a significant impact on its solvency.

C.5.6 Material changes over the reporting period

Barents Re have materially improved the level of reporting, and enhanced documentation to improve the risk mitigation.

In 2023 the company main outsourcer faced a cyber-attack affecting the claims management process. Result of the attack was a direct loss of EUR 4.5m. The loss is expected to be fully recovered but the incident highlighted some weakness in the internal control system in multiple areas (IT security, Outsourcing management, Finance Operations). An action plan has been defined for each area and its implementation is regularly followed up through the quarterly risk and control assessment process.

Barents Reinsurance S.A. 29 of 53

C.6 Other material risks

C.6.1 Strategic Risk

Strategic risk is the possibility of adverse outcomes that may result from strategic initiatives taken or not taken by Barents Re. This may include business expansion or contraction, mergers and acquisitions, negative impacts to reputation or brand management, or failure of the Board to provide adequate oversight of the business or make appropriate business decisions.

Strategic risk is currently considered to be stable. The risk will also remain stable in the medium to long term time horizon given that the Barents Re strategy is to focus on organic growth in the established lines of business.

Key Mitigating Controls

Examples of some key controls being implemented to effectively manage strategic risks include:

- Board review of business plans and operating budgets
- Business planning process.
- Stress and scenario testing
- · Board training

C.6.2 Regulatory and legal risk

The insurance industry is a highly regulated sector and, as such, is exposed to continuous regulatory change. This can affect the level of capital that firms are required to hold or require changes to how they are set up operationally from time to time. Regulatory risk is the risk of failing to act in accordance with relevant regulatory requirements in all relevant jurisdictions or a deterioration in the quality of relationship with one or more regulators. Legal risk is the risk of failing to act in accordance with relevant legal requirements in all relevant jurisdictions.

Key Mitigating Controls

Examples of some key controls in place for Barents Re's regulatory and legal risks include:

- Local legal and compliance expertise;
- Management and oversight of regulatory engagement by the Head of Legal and Compliance;
- Risk and Compliance events reporting, and
- Group wide mandatory regulatory compliance training.

C.6.3 Group risk

Group risk encompasses the risks arising from the interconnected nature of the Group and its entities.

Contagion risk arises from Barents Re's internal reinsurance and internal transactions risk arises from intercompany transactions and services arrangements not being carried out in a way that satisfies legal or regulatory requirements.

Key Mitigating Controls

Examples of some key controls in place for Barents Re's Group risks include:

Barents Reinsurance S.A. 30 of 53

- Annual review by the Risk Committee of the register of shared reinsurance purchases; and
- Entity-specific governance.

C.6.4 Climate change risk

Climate change risk has many indicators including higher concentrations of greenhouse gases, a warming atmosphere and ocean, diminished snow and ice, and sea level rise, appears to have contributed to unpredictability, increase in the frequency and severity of natural disasters and the creation of uncertainty as to future trends and exposures. As such, climate change potentially poses serious financial implications for the insurance industry in areas such as underwriting, claims and investments.

Barents Re recognises that it needs to be part of the solution by working with those interested in the transition to more sustainable energy, acknowledging that we need to partially transition reinsurance, investments, and operations out from areas where the carbon footprint is considered to be high-impact or detrimental.

Key Mitigating Controls

Examples of some key controls in place for Barents Re's Group risks include:

- Introduction of a ESG policy and framework
- Definition of ESG strategy and related action plan to address identified deficiencies of area of improvement

C.6.5 Any Other information

Risk Profile of the company is in line with the company structure and business model.

Barents Reinsurance S.A. 31 of 53

D. Valuation for Solvency Purposes

D.1 Assets

The Solvency II balance sheet is based on the fair value method. For assets, the fair value is the market value; the total Solvency II value is the sum of the market value and the associated accrued interest, where applicable. The following tables shows the differences in assets solvency II valuation compared with Lux GAAP

Balance Sheet in	Statutory accounts value	Solvency II value	Differences
Assets			
Deferred acquisition costs	9,881.1	0.0	9,881.1
Investments (other than assets held for index-linked and unit-linked contracts)	15,081.4	15,643.0	-561.6
Equities	703.3	1,131.7	-428.4
Reinsurance recoverables from:	287,947.0	199,545.2	88,401.8
Reinsurance receivables	70,811.1	70,811.1	0.0
Cash and cash equivalents	76,937.4	76,937.4	0.0
Any other assets, not elsewhere shown	4,044.4	3,390.9	653.5
Other asset	6,430.9	6,032.1	398.8
Overall Total assets	471,133.3	372,359.7	98,773.6

DAC (Deferred Acquisition Costs)

Deferred acquisition costs represent the proportion of acquisition costs incurred, which corresponds to the proportion of gross premiums written which are unearned at the balance sheet date. DAC is not recognised as an asset in the Solvency II balance sheet.

Investment in bonds and collective investment undertakings

Adjustment made to the valuation of investments for the purposes of Solvency II as they are valued on a market value basis whereas under Lux GAAP, they are valued on historical acquisition cost, and the debt securities are valued at amortised cost or acquisition cost. Accrued interest on Bonds is classified as any other assets under Lux GAAP but is considered a component of the bond valuation under Solvency II.

Reinsurance recoverables

Reinsurance recoverables are a component of the Solvency II technical provisions, and further details and the differences between the Lux GAAP and Solvency II valuation bases are explained in the technical provisions section.

Any other assets:

The difference comes from the "Accrued interest" from deposits and bonds.

D.2 Technical provisions

D.2.1 Technical Provisions Valuation

Solvency II requires the technical provisions to be a best estimate of the current liabilities relating to insurance contracts, plus a risk margin.

- The best estimate liabilities are calculated as the discounted best estimate of all future cash flows
 relating to claim events prior to the valuation date (claims provisions), and the discounted best
 estimate of all future cash flows relating to future exposure arising from policies that the insurer is
 obligated to at the valuation date (premium provisions).
- Risk margin is the amount that insurers and/or reinsurers would require over and above the best estimate liabilities in order to take over and meet the insurance and reinsurance obligations over the lifetime of the policies (i.e. the amount required to transfer liability to a third party).

The following table shows the discounted technical provisions as at 31 December 2023 for Barents Re Solvency II lines of business.

Solvency II line of business €000		Gross	Outward	Net	Risk Margin	Technical Provisions 2023	Technical Provisions 2022
Direct business and accepted proportional reinsurance	Income protection insurance	0.0	0.0	0.0	0.0	0.0	106.5
	Marine, aviation and transport insurance	91,458.6	85,756.1	5,702.4	2,276.9	7,979.4	-3,185.1
	Fire and other damage to property insurance	1,575.5	1,572.8	2.7	39.2	41.9	183.3
	General liability insurance	32,796.7	32,313.4	483.3	816.5	1,299.8	940.2
	Credit and suretyship insurance	27,790.0	24,784.5	3,005.4	691.9	3,697.3	2,985.0
	Miscellaneous financial loss	7.9	7.0	0.8	0.2	1.0	1.0
accepted non- proportional reinsurance	Non-proportional health reinsurance	511.9	0.0	511.9	12.7	524.7	0.1
	Non-proportional casualty reinsurance	5,009.7	4,597.5	412.3	124.7	537.0	39.0
	Non-proportional marine, aviation and transport reinsurance	10,234.1	9,556.3	677.8	254.8	932.6	386.9
	Non-proportional property reinsurance	11,420.8	10,413.2	1,007.6	284.3	1,292.0	369.3
Total Non-Life obligation		180,805.2	169,000.8	11,804.4	4,501.3	16,305.7	1,826.2
Life obligation		29,633.1	30,544.4	-911.3	737.7	-173.6	2,113.0
Total		210,438.2	199,545.2	10,893.0	5,239.1	16,132.1	3,939.2

At 31 December 2022, the discounted net technical provisions were EUR 4.0 m, increasing by EUR 12.1 m to EUR 16.1 m as at 31 December 2023. The key movements in technical provisions are driven by the recognition of future outwards reinsurance coverage, the gross movements are aligned with business performance.

Barents Reinsurance S.A. 33 of 53

D.2.2 Methodology and assumptions used in valuing the technical provisions

Best estimate liabilities

The best estimate contains no margins for prudence or optimism and is intended to represent the mean of the aggregate distribution of claims reserves. Gross and reinsurance cash flows are estimated separately for premium and claims and these are used to calculate net results.

The most appropriate level of granularity is used when producing the reserve estimates, by categorizing risks into homogeneous risk groupings. The risk groups are determined by the Reserving team after examination of the characteristics of the business being written and after discussions with the Underwriting and Claims teams. These groupings are reviewed when the mix of business within a reserving class has changed significantly over time.

Ultimate premium and claim estimates, gross of reinsurance, are then calculated using at least the following actuarial projection techniques:

- Chain ladder method,
- Bornhuetter-Ferguson (BF) method.

The projection method selected for a particular class of business depends on various factors, including the characteristics of the class and the length of the claims development. The chain ladder method based on the historic claims development of incurred claims has typically been used for the older underwriting years.

However, the claims experience on the most recent underwriting years is relatively immature and the chain ladder method produces estimates with a relatively higher level of uncertainty for these years. For this reason, the BF method has typically been used for the more recent underwriting years. The BF method places weight on initial loss expectations and is less volatile to early claims experience. As the underwriting years become more mature, more weighting is placed on the emerging experience and the projection will move over to a chain ladder projection (or blend of the BF and chain ladder methods). This transition will occur quicker on the shorter-tailed classes than the longer-tailed ones.

Where there is limited history of Barents Re's experience, consideration has been given to peer benchmark experience from external sources. The selected benchmarks are felt to be similar and relevant to the business written by Barents Re.

In addition to this, information on new or potentially material claims which are not included in the current incurred position is provided by the Claims team. The Reserving team reviews this information, and where appropriate, will incorporate it into the analysis.

For large and complex events that lead to an accumulation of losses, an exposure assessment is made by the underwriting and claims teams, with a view to estimating the ultimate claims cost for that event. As losses develop, these assessments are reviewed and updated through a process coordinated by the claims team, with input by the underwriting and reserving teams.

Reinsurance recoveries for each reserving class and underwriting year have been estimated by applying expected external and internal recovery rates to the gross IBNR estimates and adding known recoveries to date. These recovery rates are based on a review of the reinsurance programs purchased, historical recovery rates and for classes with quota share protection, the quota share cessions are applied to estimate recoveries.

Events not in data ("ENID") are potential events which are not adequately contained within historical claims experience. Barents Re is required to include an allowance for these within the Technical Provision calculations, such that the mean technical provisions represent the probability-weighted average of all future cash flows.

There are no guarantees or options that materially affect the calculation of technical provisions. Any relevant guarantees would be identified through discussions with underwriters and the impact of guarantees would be valued on a best estimate basis.

Risk margin

The Barents Re risk margin is calculated using a cost of capital approach which involves calculating the cost of holding the regulatory capital requirement implied by the standard formula capital assessment model at each future time period until the business has run off. The amounts are then discounted back to the current time period.

Assumptions

Assumptions and parameters are set by members of the Reserving team with the relevant knowledge and understanding, and with adequate experience. Assumptions are set consistently across the Group and where this is not possible, the differences are understood.

Where sufficient, quality data is not available, benchmark information is used overlaid with expert judgement to determine suitable assumptions. The input of expert judgement allows for specific knowledge and experience to be utilised.

All assumptions and parameters are subject to regular review to ensure that they are appropriate for their intended purpose.

The key assumptions are listed below along with some of the key measures considered when setting them.

- Initial Expected Loss Ratio (IELR) selected IELRs are determined using historical experience, rate change indices and benchmark information,
- Premium and claims development patterns,
- Tail development,
- Allowance for future inflation,
- Reinsurance recovery rates details of reinsurance program, historical recoveries,
- Unincepted Legal Obligations (ULOs) premium business written prior to but incepting after the valuation date,
- Events not in data ("ENID") loadings a loading is applied to the reserves to allow for binary events, or adjustments based on factors external factors i.e. climate change.
- Expense forecast estimate of the future expenses required to fully run off all the liability cash flows.
- Underwriting year expense allocation,
- · Counterparty default percentages, and
- Recovery in default.

D.2.3 Description of the level of uncertainty associated with the value of the technical provisions

The estimates shown in this report reflect all available data and information available at the valuation date. Despite this, the actual cost of settling future claims is uncertain as it depends on events yet to occur. These could be different from the estimates reported above, and possibly materially so. The most significant drivers of this uncertainty are highlighted below:

Inflation

Inflation has materially increased in recent years. The driver is not unique but a combination of factors including supply chain disruption, the exit of the COVID-19 pandemic, and the Ukrainian conflict. Inflation can greatly influence the cost of settling claims, and the uncertainty is compounded by the inherent uncertainty over the timing of claims settlements. Shorter tailed classes are directly impacted by spikes in materials costs, for example, whereas longer tailed classes are more exposed to the compounding nature of inflation.

Initial Expected Loss Ratio (IELR) selection

IELRs for each class of business have been selected by analysing historical performance and external benchmark for market competitors. The nature of the IELR estimates, which incorporate a large degree of expert judgement, means that there is a degree of uncertainty surrounding their values, particularly where significant changes have been made to the underwriting. The IELR is a key driver of Barents Re's technical provision estimates for the most recent years of account.

Growing accounts

Classes which are increasing in size can be subject to increased uncertainty. If growth is driven by a change in the mix of risks written (e.g. different types of risks, new territories, increasing exposure, relaxing terms and conditions) this can increase the uncertainty considerably for a class of business.

Long-tailed classes of business

Longer-tailed classes are subject to uncertainty arising from a number of different factors; for example, claims inflation and changes in litigation such as judicial reforms. In addition, reporting and settlement delays can mean it may take many years before we can be certain of a final outcome, with any significant changes in results possibly having a material impact on assumptions made on the more recent years of account. Weakening terms and conditions also add additional uncertainty.

Unearned exposure

The technical provisions include cash flows associated with unearned exposures. As there is a greater degree of uncertainty attached to the unearned exposure, the estimates for these years of account will be subject to additional uncertainty.

Unincepted Legal Obligations

Barents Re is also required to include an allowance for unincepted bound exposure within the technical provision calculations. This exposure primarily relates to contracts incepting on 1 January after the valuation date. As these contracts are entirely unearned at the valuation date, there is additional uncertainty attached to this exposure.

Barents Reinsurance S.A. 36 of 53

Events not in data ("ENID")

Events not in data ("ENID") are potential events which are not adequately contained within Barents Re's historical claims experience, i.e. climate change future impact. Barents Re is required to include an allowance for these within the Technical Provision calculations, such that the mean technical provisions represent the probability-weighted average of all future cash flows. By definition, there is little data available to base the analysis on. Loadings and classifications remain highly subjective with a high level of actuarial judgement employed.

Future expenses

Future administration expenses are based on historical levels of expenses and a projected future expense inflation rate to calculate an expense provision estimate to fully run off the entirety of future cash flows within the technical provisions. Actual expenses could be materially different to those estimated within the expense projection.

D.2.4 Differences between Solvency II and financial statement basis

The "Best Estimate" of Provisions for claims and unearned premiums is calculated by line of business. The "Best Estimate" value of actuarial liabilities corresponds to the discounted valuation of estimated future cash flows.

D.2.5 Recoverables from reinsurance contracts

Best estimate reinsurance recoverables and costs on a Solvency II basis are calculated as part of Barents Re's best estimate reserving process. Reinsurance recoverables and costs are based on known amounts, plus projections based on gross IBNR and future premium estimates. Barents Re's reinsurance programs are outlined below:

- Barents Re's most significant reinsurance protection is the Whole Account Quota Share treaty, ceding business intra-group,
- For Energy reinsurance, Barents Re maintains an external QS and a per risk XOL reinsurance program to limit the impact of large individual losses to agreed risk tolerances,
- For Life reinsurance, Barents Re maintains two XOL reinsurance programs, a per risk program
 to limit the impact of large individual losses, and a Catastrophic program for accumulation of
 risk in a single event.
- For fire and other damage to property insurance, Barents Re maintains a per risk and a catastrophe XOL reinsurance programs to limit the impact of large individual losses to agreed risk tolerances,
- A Surety reinsurance program which limits the impact of large losses, which result in multiple losses, to agreed risk tolerances, and
- o A marine and liability excess of loss program protects from high severity events.

D.3 Other liabilities

The table below shows Barents Re's total liabilities differences on a Solvency II basis compared to the amounts shown in the Lux GAAP financial statements as at 31 December 2023.

Balance Sheet in €000	Statutory accounts value	Solvency II value	Difference
Liabilities			
Technical provisions	270,051.3	185,306.5	84,744.8
Provisions other than technical provisions	34,703.3	0.0	34,703.3
Deposits from reinsurers	34,700.2	34,700.2	0.0
Deferred tax liabilities		12,526.6	-12,526.6
Reinsurance payables	44,355.4	42,712.4	1,643.0
Payables (trade, not insurance)	5,524.3	5,524.3	0.0
Any other liabilities, not elsewhere shown	5,989.8	31.9	5,957.9
Other Liabilities	46,580.9	30,370.8	16,210.0
Overall Total Liabilities	441,905.3	311,172.8	130,732.5

Unless otherwise stated, the Solvency II basis valuation for all liabilities follows fair value measurement principles. There were no changes to the recognition and valuation bases of other liabilities over the period. Further details of the liabilities and explanations for material differences between Solvency II and financial statement valuation basis are set out below.

Provisions other than technical provisions

The Equalisation Reserve under Lux GAAP is not recognised under Solvency II valuations, hence is considered a reconciliation reserve on the Solvency II Balance sheet.

Deferred tax liability(DTL)

Under LUX GAAP, the DAC payable in relation to reinsurance ceded and deferred income is considered a DTL. DTL is recognised in the Solvency II balance sheet, therefore resulting in the difference between LUX GAAP and Solvency II.

All remaining other liabilities were deemed to be adequate representations of the economic value, and no adjustments were necessary.

D.4 Alternative methods for valuation

No alternative methods for valuation were used.

D.5 Any other information

No other significant information to be disclosed.

E. Capital Management

E.1 Own funds

E.1.1 Objectives and processes employed by Barents Re for managing its own funds.

The primary objective of capital management is to manage the balance between return and risk, whilst maintaining economic capital in accordance with the risk appetite. Barents Re's capital and risk management objectives are closely interlinked, whilst recognising the critical importance of protecting policyholders' and other stakeholders' interest. In managing own funds, Barents Re seeks to, on a consistent basis:

- Maintain sufficient financial strength in accordance with risk appetite, to satisfy the requirements of regulators and other stakeholders.
- Retain financial flexibility by maintaining strong liquidity.
- Allocate capital efficiently to remain within the risk appetite and drive organic growth.

Barents Re uses several scenario tests to understand the volatility of earnings and capital requirements to manage its capital efficiently. Sensitivities to economic and operating experience are produced on Barents Re's financial performance metrics to inform decision making and planning processes over a five-year planning horizon, and as part of the risk framework for identifying and quantifying the underlying risk to which Barents Re is exposed.

A new capital management policy was implemented during the current period for managing its own funds.

E.1.2 Structure and composition of Own Funds

EUR '000		Total	Tier 1 - unrestricted	Tier 1 - restricted	Tier 2	Tier 3
		C0010	C0020	C0030	C0040	C0050

Barents Reinsurance S.A. 39 of 53

Eligible Own Funds to cover the SCR classified by level

The eligible amount of own funds to cover the Solvency Capital Requirements are classified in tiers, and Barents Re own funds are unrestricted Tier 1.

Available and eligible own funds (EUR '000)		2023	2022
Total available own funds to meet the SCR	R0500	61,187	49,269
Total eligible own funds to meet the SCR	R0540	61,187	49,269

Eligible Own Funds to cover the MCR classified by level

The eligible amount of own funds to cover the Minimum Capital Requirements are unrestricted Tier 1.

Available and eligible own funds (EUR '000)		2023	2022
Total available own funds to meet the MCR	R0510	61,187	49,269
Total eligible own funds to meet the MCR	R0550	61,187	49,269

E.1.3 Explanation of any material differences between equity as shown in Barents Re's financial statements and then calculated for solvency purposes.

Differences between Barents Re's shareholders' equity per the financial statements and the Solvency II balance sheet relate to valuation differences as shown in this document.

EUR '000	2023	2022
Shareholders' equity as shown in the financial statements	29,228.1	29,228.1
Solvency II valuation adjustments to assets	-98,773.6	-69,157.9
Solvency II valuation adjustments to technical provisions	84,774.8	25,648.1
Solvency II valuation adjustments to other liabilities	45,957.7	63,550.8
Overall Total assets	61,187.0	49,269.1

E.1.4 Own fund items included under transitional arrangements under Solvency II

All own funds items are unrestricted Tier 1 own funds and no other items are included in own funds under transitional arrangements under Solvency II

E.1.5 Ancillary own funds

Barents Re has not applied for CAA approval of any Ancillary Own Funds items and therefore no such items are included within own funds.

E.1.6 Own funds restrictions

Barents Re does not have any ring-fenced funds and has not identified any other restrictions which need to be made to own funds as a result of availability or transferability of own funds within Barents Re.

Barents Reinsurance S.A. 40 of 53

E.2 Solvency Capital Requirement and Minimum Capital Requirement

E.2.1 SCR and MCR results

Barents Re's Standard formula SCR and MCR for the year ended 31 December 2022 and 2023 are as follows

€000	2023	2022
SCR	32,312.0	31,506.2
MCR	8,675.0	7,876.5
Solvency Ratio	189%	156%

Standard formula SCR split by modules.

Barents Re's SCR for the year ended 31 December 2022 and 2023, split by risk module.

SCR by Risk Type '€000	2023	2022
Market risk	8,233.86	7,500.00
Counterparty default risk	23,265.98	17,092.00
Life underwriting risk	2,852.33	485.00
Health underwriting risk	184.35	166.00
Non-life underwriting risk	15,149.92	15,062.00
Diversification	(12,196.23)	(9,295.00)
Intangible asset risk	_	-
Basic Solvency Capital Requirement	37,490.21	31,009.00
Operational risk	5,557.50	5,288.00
Loss-absorbing capacity of technical provisions	_	-
Loss-absorbing capacity of deferred taxes	(10,736.10)	(4,791.00)
Other adjustements	<u>-</u>	-
Solvency Capital Requirement excluding capital add-ons	32,311.61	31,506.00

E.3 Use of duration-based equity risk sub-module in the calculation of SCR

The duration-based equity risk sub-module was not used.

E.4 Differences between the standard formula and any internal model used

Barents Reinsurance S.A. used the standard formula.

E.5 Non-compliance with the MCR and non-compliance with the SCR

The Company complied with the MCR and SCR at all times.

E.6 Any other information

No other information to be disclosed.

Barents Reinsurance S.A. 41 of 53
